CLIFFSingle Touch Proof Terminal Binding Posts

The **CLIFF**[®] range of single touch proof Terminal Binding Posts is designed for use in varied applications including professional and consumer audio, test and measurement, power supplies and industrial uses. Terminal spindles and mounting hardware are manufactured from high quality solid brass, either nickel or gold plated. Plastic parts are molded from tough glass reinforced Nylon, Polypropylene or clear Resin. Terminals are shrouded and 'touch proof' to reduce the risk of accidental electric shock in higher current applications and also comply with European safety regulations. Most models are UL approved.

Significant features include:

- All models have the CLIFF® Castellated Knob.®
- Conform to the general requirements of UL 813 and EN 60065.
- Terminals are 'touch proof' to reduce the risk of accidental electric shock in higher current applications.
- UL approved. File E151339.
