

For applications where Metal Body Connectors are specified, our M Series will meet the most severe specifications. All Electrical Contact parts are silver plated by a process to give low noise levels. No increase in noise level may be expected over 5000 Plug / Un-Plug Operations. Black finish is available subject to viable quantity. Large solder bucket contacts are used to make wiring easy.

<p><b>3 Pole Female Socket</b></p> <p><b>3ACF/M (FC6100)</b> We also make plastic PCB versions of 3 pin XLR.</p>	<p><b>3 Pole Male Socket</b></p> <p><b>3ACM/M (FC6105)</b> We also make plastic PCB versions of 3 pin XLR.</p>

Products may be subject to design change without notice. Always design in from samples to avoid possibility of dimension errors. Store product in the dry to minimise oxidation of silver plated contacts.
